Profitable Feeds for Livestock and Poultry. They Lower Your Cost of Production and Make You More Profits

On account of continual changing prices and conditions we are not publishing prices on feed and many other items. We will be glad to quote prices on request or will invoice at the prevailing market price when order is received.

A Word to Gardeners and Farmers

Our stock is selected with the greatest possible care, both to trueness of variety and germination test, and while in common with other seedmen, we cannot guarantee the resulting crop, our customers may rest assured that we will exert every effort to get the most pure and best seeds obtainable for our stock. Our nearness to you makes both for the personal desire to please customers whom we know and often meet, and convenience to you in ordering and quick delivery. We maintain for the entire San Juan Basin a retail store where a welcome awaits you. We invite you to our store whether you buy or not. Perhaps we can offer some profitable suggestions in going over your gardening or farming problems.

Convert Legume Seeds Into Fertilizer Plants
by
Inoculating With

NITRAGIN

We encourage the farmer to inoculate all legume seeds whether planted on old or new fields. It costs but a few cents per acre. It seldom pays to depend upon natural inoculation.

NITRAGIN—is the oldest and most widely used inoculator in America, having served the American farmers since 1898.

1 lb., 30c; 10 lbs., \$2.00; 25 lbs., \$4.50; 100 lbs. \$15.00

Blue Vitriol or Sulphate of Copper is a preventative of smut in grain. It is very effective and probably the cheapest fungicide in use today. One pound of Blue Vitriol dissolved in 20 gallons of water is sufficient to treat 30 bushels of wheat or barley for smut. Five pounds of Blue Vitriol and five gallons of lime added to 60 gallons of water is effective for celery spray.

FORMALDEHYDE, 1 lb., 50c; gal. ----- 2.10

Formaldehyde is of pronounced efficiency in destroying disease germs affecting both animal and plant life. Is successfully employed as a preventative of such fungus diseases as potato scab, onion and grain smuts, musty corn, and other affected seeds damping off of seedlings, club root of roses, etc.

DuBAY SEED DISINFECTANTS—

Most growers are familiar with the destruction caused by smuts of small grains, root-rots of corn, scab of potatoes, certain boll-rots of cotton, damping-off of flower and vegetable seedlings and many similar diseases, which are surface seedborne.

Dubay Seed Disinfectants pay large profits by destroying disease organisms before they can do damage by preventing seed rotting in cold, wet soils, by producing better stands or more vigorous plants, by increasing yields, and by improving crop quality.

HINMAN

LOW-VACUUM

MILKERS

Jiffy

*Fast, Clean Milking
With Less Stripping.*

For more than 7 years, Hinman has pioneered the idea of low-vacuum milking. That principle has now been thoroughly established, but it took years of research and thousands of tests to find the exact degree at which a cow milks best. Hinman found it—at 10 inches. Vacuum at 10 inches safely empties the udder faster. Besides, it makes the cow comfortable, and enlists her cooperation. Its mild action helps keep teats and udders in good condition—that's why so many Grand Champion cows for years have been milked exclusively with Hinman Milkers. New Hinman Air Flow Vacuum Pump with electric motor is a small, powerful, economical unit.

**ORDER
EARLY**

Everybody wants good chicks this year
—so see us today to place your order.
Our chicks are strong and vigorous . . .
bred to live, lay and pay.

THEY are Bred for High Production.
Come from Bloodtested Flocks.

Parent flocks get a special breeder ration. What a hen eats has a lot to do with vigor and livability of her chicks. Parent flocks are fed Purina Layena or Purina Breeder Lay Chow and grain. The rations pack the egg with nutrients needed during the 21 days in the shell plus a reserve to get the chick started with a bang.
